Education

ABES Engineering College

Bachelor of Science in Computer Science

Sep. 2023 – June 2027

Ghaziabad, U.P

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- Software Methodology
- Database Management
- Internet Technology
- Computer Architecture

Experience

BarterNow

Backend Developer Intern

November 2025 – Present

Remote

- Develop and maintain backend services and **REST APIs** using *Node.js* and *Express.js*, implementing core business logic, request validation, structured error handling, and consistent API responses for active product features.
- Design and manage **PostgreSQL** database schemas using *Prisma ORM*, handling schema evolution through migrations, defining table relationships, and optimizing queries to ensure data integrity and backend performance.

Freelance Software Engineer

Self-Employed

May 2025 – Present

Remote

- Deliver end-to-end production systems for clients, owning backend architecture, database design, API development, deployment, and post-launch maintenance.
- Build and manage production databases using PostgreSQL and Prisma ORM, including schema design, migrations, performance tuning, and data integrity enforcement.

Projects

DePIN Uptime Monitor App - TypeScript, Next.js, Express.js, Solana

Feb 2025

- Monitoring and rewards system for decentralized validators that tracks network uptime, logs performance data, and automates payouts for high availability.
- Designed and built the system end-to-end, including uptime tracking, performance evaluation, and on-chain reward execution.
- Tools Used: Next.js, PostgreSQL, Solana (web3.js), Cron jobs, Docker, Webhooks, Git

DHiree - React, Solidity

Dec 2025

- Built a decentralized freelance marketplace using React and Ethereum smart contracts, enabling transparent job postings, application workflows, and trustless interactions between clients and developers.
- Tools Used: React, Solidity, Hardhat, Ethers.js, IPFS, Git

Flashmon - CLI Tool - TypeScript, Node.js

Jun 2025

- Lightweight CLI tool for auto-reloading Node.js applications on file changes, similar to Nodemon, with improved performance and cleaner logging.
- Supports custom commands, debounce handling, and configurable watch paths using the chokidar file watcher.
- Tools Used: TypeScript, Node.js, Commander.js, Chokidar, Chalk, child process

Technical Skills

Languages: JavaScript, TypeScript, SQL, Solidity, Rust

Frameworks and Libraries: Node.js, Express.js, React.js, Next.js, Prisma

Databases: PostgreSQL, Redis

Tools and Platforms: Git, Docker, AWS, Google Cloud Platform, Linux, Kafka

Leadership / Extracurricular

CodeChef ABESEC Chapter

Vice President

Aug 2025 – Present

ABES Engineering College

- Lead a 40-member team to plan and execute large-scale technical events
- Organized offline events with participation of up to 750 students
- Built and managed a technical community of over 1,100 members
